

SFN Satellite Symposium

Sponsored by the National Institute of Neurological Disorders and Stroke

How Can Understanding Protein Structure Help Us Unravel the Mysteries of Misfolded Protein-based Neurodegenerative Diseases?

October 18, 2015
6:30-10:30 p.m.

Chicago Fairmont Hotel
200 North Columbus Drive
Chicago, IL

Keynote Address:

Dr. W. E. Moerner
2014 Nobel Laureate in Chemistry

This workshop will explore how advances in structural biology (cryo EM, cryo ET, NMR) coupled with biochemical approaches can help us identify and characterize the protein species associated with neuronal and glia dysfunction and toxicity. A reception (sponsored by FEI) and eposter session will follow the presentations.

Registration is free. Space is limited.
