

## Sample Testing Funnel for Discovery-Stage Projects

**Note:** This example is for illustrative purposes only. BPN Biologics is not endorsing particular assays, criteria, or flowchart formats.

A testing funnel is a flowchart that can be used to show proposed assays and go/no-go criteria to advance leads entering the BPN Biologics program through clinical candidate nomination. Testing Funnel are included in the Research Strategy of Discovery-stage applications. Section IV of the funding opportunities ([PAR-24-293](#) and [PAR-24-294](#)) for instructions.

### Hypothetical monoclonal antibody (mAb) directed against protein X
